HANDMADE WIRE BASKETS

*Swedish tradition since 1922*

Skäggenäs 1947

## **SWEDISH TRADITION SINCE 1922**

KORBO Handmade Wire Baskets are functional baskets with a history that dates back to the early 1920's Sweden. The baskets are timeless and beautiful tools that in the old days were used by farmers, fishermen or anyone who needed reliable carrying and storage that could withstand weather, wind, wear and tear.

The photograph opposite is from 1947 and taken in the small fishing village of Skägganäs, located on the east coast of Sweden. The basket that the fishermen are using is a Classic 35.

## **CLASSIC SERIES**

The Classic 35 was the first model in production in 1922 and all other models have been developed from this original design. The baskets in the Classic series are available in five different sizes.

*KORBO Classic 80*

*KOPBO Classic 65 with Planting bag*

*KORBO Classic 35 with Planting bag*

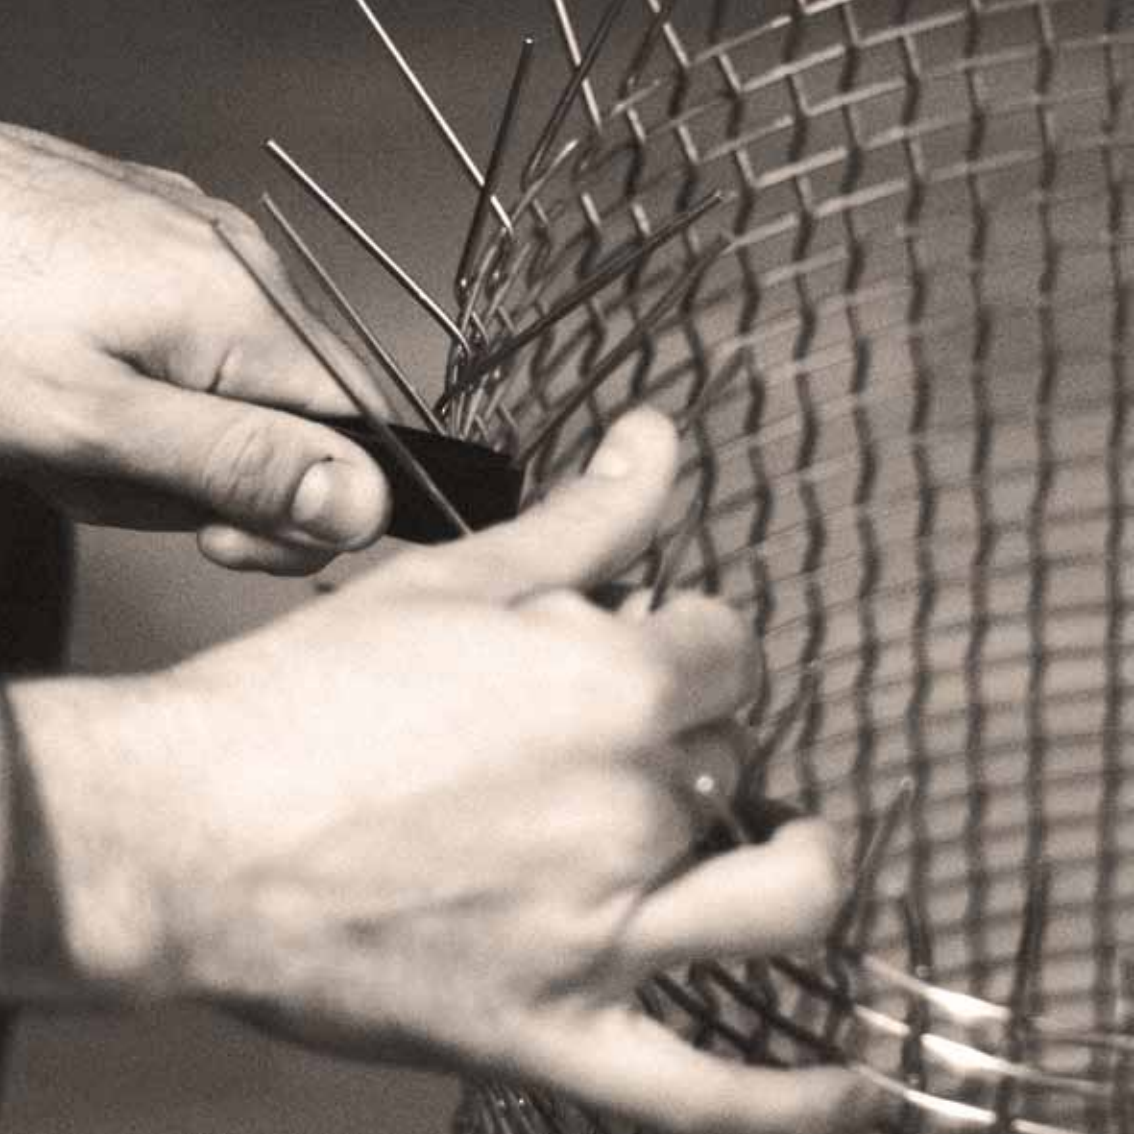

*KORBO Classic 80 with Laundry bag*

*KORBO Classic 120*

## **WOVEN BY HAND FROM A SINGLE WIRE**

The manufacturing of the wire baskets started in 1922 and ever since then the baskets have been woven by hand using the exact same technique. Our unique construction, a single hand-woven long wire completely without welding, is the reason that the KORBO baskets are so durable – there are simply no parts of the basket that can fall apart.

## **BUCKET SERIES**

The models in the Bucket series have a foldable handle and are available in three different sizes. The straight-sided Bucket 20 has been specially designed to fit 15 bottles.

*KORBO Bucket 20*

*KORBO* Bucket 16

An open book with a colorful cover lies flat on the wooden countertop.

A collection of bottles, including olive oil, vinegar, and other condiments, sits on a white rectangular tray or container on the counter.

A metal rack is mounted on the wooden cabinet below the counter, holding several books and hanging kitchen tools like spatulas and tongs.

A stainless steel oven is visible on the right side of the image, partially obscured by the white cabinet.

## **MATERIALS**

KORBO Handmade Wire Baskets are available in two different materials: galvanized steel and acid-proof stainless steel.

### *Galvanized steel:*

Galvanization is a process used to prevent corrosion of the steel by adding a physical barrier of zinc to the surface. Galvanized steel has been effectively used for more than 150 years and the wire will, over time, obtain a beautiful matte patina.

*Acid-proof stainless steel:*

Acid-proof stainless steel contains nickel and molybdenum that together with steel form an alloy which is completely stainless. Unlike galvanized wire, acid-proof stainless wire is not just protected on the surface; it is stainless all the way through.

The baskets in acid-proof stainless steel have a surface that will remain shiny regardless of environmental exposure.

## MODELS

### CLASSIC SERIES

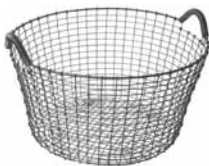

#### CLASSIC 24

24 litres

H 28 cm, TD 38 cm\*

Galvanized/Acid-proof stainless

#### CLASSIC 35

35 litres
